

INTERNATIONAL STANDARD

ISO
6981

Second edition
1992-03-15

Hydraulic fluid power — Cylinders — Rod end plain eyes — Mounting dimensions

*Transmissions hydrauliques — Vérins — Tenons simples d'extrémité de
tige de piston — Dimensions d'interchangeabilité*

Reference number
ISO 6981:1992(E)

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

Draft International Standards adopted by the technical committees are circulated to the member bodies for voting. Publication as an International Standard requires approval by at least 75 % of the member bodies casting a vote.

International Standard ISO 6981 was prepared by Technical Committee ISO/TC 131, *Fluid power systems*, Sub-Committee SC 3, *Cylinders*.

This second edition cancels and replaces the first edition (ISO 6981:1982), figure 1 and table 1 of which have been technically revised.

Annex A of this International Standard is for information only.
