Asbestos-cement pipelines — Guidelines for hydraulic calculation

Canalisations en amiante-ciment — Principes directeurs pour le calcul hydraulique

First edition — 1984-05-15

UDC 691.328.5-462 : 532.542

Ref. No. ISO 7336-1984 (E)

Descriptors : asbestos cement products, pipelines, fluid flow, water, computation, viscosity, kinematic viscosity, formulae (mathematics).

Price based on 5 pages

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of developing International Standards is carried out through ISO technical committees. Every member body interested in a subject for which a technical committee has been authorized has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work.

Draft International Standards adopted by the technical committees are circulated to the member bodies for approval before their acceptance as International Standards by the ISO Council.

International Standard ISO 7336 was developed by Technical Committee ISO/TC 77, *Products in fibre reinforced cement*, and was circulated to the member bodies in November 1982.

It has been approved by the member bodies of the following countries :

Austria	Greece	Nigeria
Belgium	India	Poland
Brazil	Iran	Portugal
Canada	Ireland	South Africa, Rep. of
China	Israel	Spain
Colombia	Italy	Switzerland
Czechoslovakia	Morocco	Venezuela
Egypt, Arab Rep. of	Mexico	Yugoslavia
France	Netherlands	
Germany, F.R.	New Zealand	

The member bodies of the following countries expressed disapproval of the document on technical grounds :

Australia
United Kingdom
USSR
