Descriptors : fasteners, screws, socket head screws, dimensions, specifications, designation, tolerances of position.

Price based on 5 pages

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of developing International Standards is carried out through ISO technical committees. Every member body interested in a subject for which a technical committee has been authorized has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work.

Draft International Standards adopted by the technical committees are circulated to the member bodies for approval before their acceptance as International Standards by the ISO Council.

International Standard ISO 7379 was developed by Technical Committee ISO/TC 2, *Fasteners*, and was circulated to the member bodies in December 1981.

It has been approved by the member bodies of the following countries:

Australia	Germany, F.R.	New Zealand
Belgium	Hungary	Norway
Brazil	India	Romania
China	Italy	South Africa, Rep. of
Czechoslovakia	Japan	Spain
Denmark	Korea, Dem. P. Rep. of	USA
Egypt, Arab Rep. of	Korea, Rep. of	USSR
Finland	Mexico	

The member bodies of the following countries expressed disapproval of the document on technical grounds:

Ireland
Netherlands
Switzerland
United Kingdom
