## **Nuclear power plants — Guidelines to ensure quality of collected data on reliability**

*Centrales nucléaires — Principes directeurs pour assurer la qualité des données de fiabilité recueillies*

**First edition — 1983-08-01**

---

**UDC 621.039.577 : 519.248**

**Ref. No. ISO 7385-1983 (E)**

**Descriptors :** nuclear power plants, quality control, information, reliability, rules (instructions).

## Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of developing International Standards is carried out through ISO technical committees. Every member body interested in a subject for which a technical committee has been authorized has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work.

Draft International Standards adopted by the technical committees are circulated to the member bodies for approval before their acceptance as International Standards by the ISO Council.

International Standard ISO 7385 was developed by Technical Committee ISO/TC 85, *Nuclear energy*, and was circulated to the member bodies in February 1982.

It has been approved by the member bodies of the following countries :

|                     |                |                       |
|---------------------|----------------|-----------------------|
| Australia           | Germany, F.R.  | Romania               |
| Austria             | Italy          | South Africa, Rep. of |
| Belgium             | Japan          | Spain                 |
| Czechoslovakia      | Korea, Rep. of | Sweden                |
| Egypt, Arab Rep. of | Mexico         | Switzerland           |
| Finland             | Netherlands    | Turkey                |
| France              | Poland         | USA                   |

The member bodies of the following countries expressed disapproval of the document on technical grounds :

Canada  
United Kingdom
