

INTERNATIONAL STANDARD

ISO
7400

Second edition
1990-11-01

Mopeds — Alternating current flasher units

Cyclomoteurs — Centrales clignotantes en courant alternatif

Reference number
ISO 7400:1990(E)

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

Draft International Standards adopted by the technical committees are circulated to the member bodies for voting. Publication as an International Standard requires approval by at least 75 % of the member bodies casting a vote.

International Standard ISO 7400 was prepared by Technical Committee ISO/TC 22, *Road vehicles*.

This second edition cancels and replaces the first edition (ISO 7400:1984), of which it constitutes a minor revision.

This International Standard forms one of a series of related Standards:

ISO 7398, *Motorcycles — Direct current flasher units*

ISO 7399, *Motorcycles — Alternating current flasher units*

ISO 7400, *Mopeds — Alternating current flasher units*

ISO 8052, *Mopeds — Direct current flasher units*
