Pipework — Stripwound flexible metal hoses — Testing and verification of characteristics

Tuyauterie — Tuyaux métalliques flexibles agrafés — Essais et vérifications des caractéristiques

First edition — 1984-08-01

UDC 621.643.34

Ref. No. ISO 7658-1984 (E)

Descriptors : metal tubes, hoses, tests, tension tests, compression tests, hydraulic tests.

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of developing International Standards is carried out through ISO technical committees. Every member body interested in a subject for which a technical committee has been authorized has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work.

Draft International Standards adopted by the technical committees are circulated to the member bodies for approval before their acceptance as International Standards by the ISO Council.

International Standard ISO 7658 was developed by Technical Committee ISO/TC 5, *Ferrous metal pipes and metallic fittings*, and was circulated to the member bodies in March 1983.

It has been approved by the member bodies of the following countries :

Australia	Germany, F. R.	Poland
Austria	India	Romania
Belgium	Italy	South Africa, Rep. of
Brazil	Korea, Rep. of	Sweden
China	Mexico	Switzerland
Czechoslovakia	Netherlands	United Kingdom
France	Norway	USA

No member body expressed disapproval of the document.
