Microbiology — Standard layout for methods of microbiological examination

Microbiologie — Plan normalisé pour les méthodes d'examen microbiologique

First edition — 1983-12-15

UDC 579.67

Ref. No. ISO 7667-1983 (E)

Descriptors : microbiological analysis, layout, agricultural products, food products.

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of developing International Standards is carried out through ISO technical committees. Every member body interested in a subject for which a technical committee has been authorized has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work.

Draft International Standards adopted by the technical committees are circulated to the member bodies for approval before their acceptance as International Standards by the ISO Council.

International Standard ISO 7667 was developed by Technical Committee ISO/TC 34, *Agricultural food products*, and was circulated to the member bodies in November 1982.

It has been approved by the member bodies of the following countries:

Australia	Iran	Portugal
Austria	Iraq	Romania
Brazil	Israel	South Africa, Rep. of
Canada	Kenya	Spain
Chile	Korea, Dem. P. Rep. of	Thailand
Czechoslovakia	Malaysia	Turkey
Egypt, Arab Rep. of	Mexico	United Kingdom
Ethiopia	Netherlands	USA
France	New Zealand	USSR
Germany, F. R.	Peru	Venezuela
Hungary	Philippines	Yugoslavia
India	Poland	

No member body expressed disapproval of the document.
