Intra-uterine devices — Part 3 : Packaging and labelling

Dispositifs intra-utérins — Partie 3 : Emballage et étiquetage

First edition — 1983-11-01

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of developing International Standards is carried out through ISO technical committees. Every member body interested in a subject for which a technical committee has been authorized has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work.

Draft International Standards adopted by the technical committees are circulated to the member bodies for approval before their acceptance as International Standards by the ISO Council.

International Standard ISO 7857/3 was developed by Technical Committee ISO/TC 157, *Mechanical contraceptives*, and was circulated to the member bodies in October 1982.

It has been approved by the member bodies of the following countries :

China	India	Sri Lanka
Czechoslovakia	Korea, Rep. of	Sweden
Denmark	Netherlands	Thailand
Egypt, Arab Rep. of	Poland	USSR
France	South Africa, Rep. of	

The member bodies of the following countries expressed disapproval of the document on technical grounds :

Australia
USA
