8319-1

Second edition
1996-05-15

Orthopaedic instruments — Drive connections —

Part 1:

Keys for use with screws with hexagon socket
heads

Instruments orthopédiques — Raccords d'entraînement —

Partie 1: Clés à utiliser pour les vis à tête à six pans creux

Reference number
ISO 8319-1:1996(E)

ISO 8319-1:1996(E)

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

Draft International Standards adopted by the technical committees are circulated to the member bodies for voting. Publication as an International Standard requires approval by at least 75 % of the member bodies casting a vote.

International Standard ISO 8319-1 was prepared by Technical Committee ISO/TC 150, *Implants for surgery*, Subcommittee SC 5, *Osteosynthesis*.

This second edition cancels and replaces the first edition (ISO 8319-1:1986), which has been technically revised.

ISO 8319 consists of the following parts, under the general title *Orthopaedic instruments — Drive connections*:

- *Part 1: Keys for use with screws with hexagon socket heads*
- *Part 2: Screwdrivers for single slot head screws, screws with cruciate slot and cross-recessed head screws*

Annexes A and B of this part of ISO 8319 are for information only.
