Sodium tripolyphosphate and sodium pyrophosphate for industrial use — Determination of loss on ignition

Tripolyphosphate et pyrophosphate de sodium à usage industriel — Détermination de la perte au feu

First edition — 1976-11-01

UDC 661.635.2 : 543.716

Ref. No. ISO 853-1976 (E)

Descriptors : sodium tripolyphosphates, sodium pyrophosphates, chemical analysis, measurement, loss on ignition.

Price based on 2 pages

ISO 853-1976 (E)

FOREWORD

ISO (the International Organization for Standardization) is a worldwide federation of national standards institutes (ISO member bodies). The work of developing International Standards is carried out through ISO technical committees. Every member body interested in a subject for which a technical committee has been set up has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work.

Draft International Standards adopted by the technical committees are circulated to the member bodies for approval before their acceptance as International Standards by the ISO Council.

Prior to 1972, the results of the work of the technical committees were published as ISO Recommendations; these documents are in the process of being transformed into International Standards. As part of this process, Technical Committee ISO/TC 47, *Chemistry*, has reviewed ISO Recommendation R 853-1968 and found it technically suitable for transformation. International Standard ISO 853 therefore replaces ISO Recommendation R 853-1968, to which it is technically identical.

ISO Recommendation R 853 had been approved by the member bodies of the following countries :

Austria	Israel	South Africa, Rep. of
Belgium	Italy	Spain
Brazil	Japan	Switzerland
Bulgaria	Korea, Dem. P. Rep. of	Thailand
Czechoslovakia	Korea, Rep. of	Turkey
Egypt, Arab Rep. of	Morocco	United Kingdom
France	Netherlands	U.S.S.R.
Germany	New Zealand	Yugoslavia
Hungary	Poland	
India	Romania	

No member body had expressed disapproval of the Recommendation.

No member body disapproved the transformation of the Recommendation into an International Standard.
