Ref. No. ISO 880-1981 (E)

Descriptors : asbestos cement products, shingles, specifications, dimensions, dimensional tolerances, physical properties, mechanical properties, tests, mechanical tests, dimensional measurement, acceptance inspection.

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards institutes (ISO member bodies). The work of developing International Standards is carried out through ISO technical committees. Every member body interested in a subject for which a technical committee has been set up has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work.

Draft International Standards adopted by the technical committees are circulated to the member bodies for approval before their acceptance as International Standards by the ISO Council.

International Standard ISO 880 was developed by Technical Committee ISO/TC 77, *Products in fibre reinforced cement*, and was circulated to the member bodies in May 1979.

It has been approved by the member bodies of the following countries :

Australia	France	New Zealand
Austria	Greece	Poland
Belgium	India	Portugal
Brazil	Ireland	Romania
Bulgaria	Israel	Spain
Chile	Italy	Switzerland
Colombia	Korea, Rep. of	Thailand
Czechoslovakia	Libyan Arab Jamahiriya	USSR
Egypt, Arab Rep. of	Mexico	Yugoslavia
Finland	Netherlands	

The member bodies of the following countries expressed disapproval of the document on technical grounds :

Germany, F. R.
Norway

This International Standard cancels and replaces ISO Recommendation R 880-1968, of which it constitutes a technical revision.
