
**Information technology — Quality of
service: Framework**

Technologies de l'information — Qualité du service: Cadre

Contents	<i>Page</i>
1 Scope	1
2 Normative references	2
2.1 Identical Recommendations International Standards	2
2.2 Paired Recommendations International Standards equivalent in technical content	2
2.3 Additional references	2
3 Definitions	2
3.1 Basic Reference Model of Open Distributed Processing definitions	2
3.2 Basic Reference Model – OSI Management Framework definitions	2
3.3 Service Conventions definitions	2
3.4 OSI Basic Reference Model definitions	3
3.5 QOS Framework definitions	3
4 Abbreviations	4
5 Concepts of this QOS Framework	5
5.1 Introduction	5
5.2 The service to which QOS applies	5
5.3 QOS characteristics	6
5.4 User QOS requirements and QOS policies	6
5.5 QOS requirements, QOS parameters and QOS context	6
5.6 QOS management functions and QOS mechanisms	7
5.7 QOS categories	8
5.8 Initiation of QOS management	8
6 Definition of QOS characteristics	8
6.1 Introduction	8
6.2 Aspects of QOS characteristic definition	9
6.3 QOS characteristics of general importance	11
6.4 Fundamental QOS categories	19
7 QOS management	20
7.1 Introduction	20
7.2 Prediction phase	22
7.3 Establishment phase	22
7.4 Operational phase	26
7.5 Supporting services	26
8 General QOS mechanisms	27
8.1 Introduction	27
8.2 Prediction phase mechanisms	27
8.3 Establishment phase mechanisms	27
8.4 Operational phase mechanisms	28
