BRIEF HISTORY

The ISO Recommendation R 1555, *Copper and copper alloy rolled flat products (thickness less than 2.5 mm (0.1 in)) – Tensile test*, was drawn up by Technical Committee ISO/TC 26, *Copper and copper alloys*, the Secretariat of which is held by the Deutscher Normenausschuss (DNA).

Work on this question led to the adoption of Draft ISO Recommendation No. 1555, which was circulated to all the ISO Member Bodies for enquiry in March 1968.

The Draft was approved, subject to a few modifications of an editorial nature, by the following Member Bodies :

Australia	Israel	Switzerland
Belgium	Italy	Thailand
Canada	Netherlands	Turkey
Chile	New Zealand	U.A.R.
Finland	Norway	United Kingdom
France	Poland	U.S.A.
Germany	South Africa, Rep. of	Yugoslavia
India	Spain	
Iran	Sweden	

No Member Body opposed the approval of the Draft.

This Draft ISO Recommendation was then submitted by correspondence to the ISO Council, which decided to accept it as an ISO RECOMMENDATION.
