## BRIEF HISTORY

The ISO Recommendation R 467, *Preferred Modules and Diametral Pitches of Cylindrical Gears for General Engineering*, was drawn up by Technical Committee ISO/TC 60, *Gears*, the Secretariat of which is held by the Institut Belge de Normalisation (IBN).

Work on this question by the Technical Committee began in 1956 and led, in 1961, to the adoption of a Draft ISO Recommendation.

In July 1963, this Draft ISO Recommendation (No. 591) was circulated to all the ISO Member Bodies for enquiry. It was approved, subject to a few modifications of an editorial nature, by the following Member Bodies:

|           |                |                |
|-----------|----------------|----------------|
| Argentina | Greece         | Poland         |
| Austria   | India          | Spain          |
| Belgium   | Italy          | Sweden         |
| Chile     | Korea, Rep. of | Switzerland    |
| Colombia  | Netherlands    | United Kingdom |
| France    | New Zealand    | Yugoslavia     |
| Germany   | Norway         |                |

Four Member Bodies opposed the approval of the Draft:

Australia  
Czechoslovakia  
Hungary  
U.S.S.R.

The Draft ISO Recommendation was then submitted by correspondence to the ISO Council which decided, in January 1966, to accept it as an ISO RECOMMENDATION.
