

Technical drawings — Geometrical tolerancing — Tolerancing of form, orientation, location and run-out — Verification principles and methods — Guidelines

Dessins techniques — Tolérancement géométrique — Tolérancement de forme, orientation, position et battement — Principes et méthodes de vérification — Principes directeurs

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work.

The main task of ISO technical committees is to prepare International Standards. In exceptional circumstances a technical committee may propose the publication of a Technical Report of one of the following types :

- type 1, when the necessary support within the technical committee cannot be obtained for the publication of an International Standard, despite repeated efforts;
- type 2, when the subject is still under technical development requiring wider exposure;
- type 3, when a technical committee has collected data of a different kind from that which is normally published as an International Standards ("state of the art", for example).

Technical Reports are accepted for publication directly by ISO Council. Technical Reports types 1 and 2 are subject to review within three years of publication, to decide if they can be transformed into International Standards. Technical Reports type 3 do not necessarily have to be reviewed until the data they provide is considered no longer valid or useful.

ISO/TR 5460 was prepared by Technical Committee ISO/TC 10, *Technical drawings*.

The reasons which led to the decision to publish this document in the form of a Technical Report type 2 are explained in the Introduction.

UDC 744.4 : 621.753.1

Ref. No. : ISO/TR 5460-1985 (E)

Descriptors : drawings, technical drawings, tolerances : measurement, dimensional tolerances, form tolerances, tolerances of position, angular tolerances, verification, generalities.
