

Geotextiles and geotextile-related products — On-site quality control

ICS 59.080.70

National foreword

This Published Document is the official English language version of CEN/TR 15019:2005.

It is being issued as a Published Document and not a full standard because the European committee was unable to reach consensus on the content.

The UK participation in its preparation was entrusted to Technical Committee B/553, Geosynthetics, which has the responsibility to:

- aid enquirers to understand the text;
- present to the responsible international/European committee any enquiries on the interpretation, or proposals for change, and keep UK interests informed;
- monitor related international and European developments and promulgate them in the UK.

This technical report was established as an advisory document for use in circumstances and locations where the engineering culture is less developed. It has little applicability to the United Kingdom where the position and authority of the engineer, the ICE Conditions, the Contract Documents and Method Statement address and apportion the responsibilities for on-site control. Many of the recommendations in the technical report are not conducive to cost effective working required in modern construction processes and would, if followed, lead to delay and unnecessary costs.

A list of organizations represented on this committee can be obtained on request to its secretary.

Cross-references

The British Standards which implement international or European publications referred to in this document may be found in the *BSI Catalogue* under the section entitled “International Standards Correspondence Index”, or by using the “Search” facility of the *BSI Electronic Catalogue* or of British Standards Online.

This publication does not purport to include all the necessary provisions of a contract. Users are responsible for its correct application.

Compliance with a Published Document does not of itself confer immunity from legal obligations.

Summary of pages

This document comprises a front cover, an inside front cover, the CEN/TR title page, pages 2 to 16, an inside back cover and a back cover.
