

Electrostatics — Code of practice for the avoidance of hazards due to static electricity

ICS 13.260

National foreword

This Published Document is the official English language version of CLC/TR 50404:2003. It supersedes PD R044-001:1999 which is withdrawn. It is envisaged that PD CLC/TR 50404 will eventually replace BS 5958 Parts 1 and 2 but for a transitional period both documents will be current in order for users of the standards to familiarize themselves with the contents of the new document.

The UK participation in its preparation was entrusted to Technical Committee GEL/601, Code drafting committee for control of undesirable static electricity, which has the responsibility to:

- aid enquirers to understand the text;
- present to the responsible international/European committee any enquiries on the interpretation, or proposals for change, and keep the UK interests informed;
- monitor related international and European developments and promulgate them in the UK.

A list of organizations represented on this committee can be obtained on request to its secretary.

Cross-references

The British Standards which implement international or European publications referred to in this document may be found in the *BSI Catalogue* under the section entitled “International Standards Correspondence Index”, or by using the “Search” facility of the *BSI Electronic Catalogue* or of British Standards Online.

This Published Document was published under the authority of the Standards Policy and Strategy Committee on 9 July 2003
