

BSI Standards Publication

Communication networks and systems for power utility automation

Part 7-500: Basic information and communication structure
– Use of logical nodes for modeling application functions
and related concepts and guidelines for substations

National foreword

This Published Document is the UK implementation of IEC TR 61850-7-500:2017.

The UK participation in its preparation was entrusted to Technical Committee PEL/57, Power systems management and associated information exchange.

A list of organizations represented on this committee can be obtained on request to its secretary.

This publication does not purport to include all the necessary provisions of a contract. Users are responsible for its correct application.
