Marine energy – Wave, tidal and other water current converters

Part 2: Marine energy systems – Design requirements

National foreword

This Published Document is the UK implementation of IEC TS 62600-2:2019. It supersedes PD IEC/TS 62600-2:2016, which is withdrawn.

The UK participation in its preparation was entrusted to Technical Committee PEL/114, Marine energy - Wave, tidal and other water current converters.

A list of organizations represented on this committee can be obtained on request to its committee manager.

Attention is drawn to the fact that during the development of this Technical Specification, the UK committee voted against its approval.

The UK committee submitted a negative vote due to its opinion that this document does not provide extensive technical requirements for wave energy converter (WEC) or tidal energy converter (TEC) systems.

Contractual and legal considerations
