Measurement of wet gas flow by means of pressure differential devices inserted in circular cross-section conduits

National foreword

This Published Document is the UK implementation of ISO/TR 11583:2012.

The UK participation in its preparation was entrusted by Technical Committee CPI/30, Measurement of fluid flow in closed conduits, to Subcommittee CPI/30/2, Differential pressure methods. The UK national committee, CPI/30/2, consider the content of this technical report to be suitable for general application in wet gas measurement using differential pressure meters.

A list of organizations represented on this committee can be obtained on request to its secretary.

This publication does not purport to include all the necessary provisions of a contract. Users are responsible for its correct application.
