

BSI Standards Publication

**Nanotechnologies — Electron spin resonance (ESR)
as a method for measuring reactive oxygen species
(ROS) generated by metal oxide nanomaterials**

National foreword

This Published Document is the UK implementation of ISO/TS 18827:2017.

The UK participation in its preparation was entrusted to Technical Committee NTI/1, Nanotechnologies.

A list of organizations represented on this committee can be obtained on request to its secretary.

This publication does not purport to include all the necessary provisions of a contract. Users are responsible for its correct application.
